Longarm Quilting Services Disclaimer

Longarm Quilting Services

- We proudly offer Edge-to-Edge (E2E) quilting services on our BERNINA Longarm quilting machine!

What is Edge-to-Edge Quilting?

- Edge-to-Edge (E2E) quilting uses one thread color and a continuous quilting design that flows from one edge of the quilt to the other across the entire quilt top, regardless of blocks, seams, or piecing designs. This creates a beautiful overall texture and finish for your quilt.

Pricing

- Our Edge-to-Edge quilting service is priced at **3 cents per square inch with a $35 minimum charge**. Pricing includes thread.
- We use high-quality Isacord 40-weight polyester thread for beautiful, durable stitching results.

Quilt Size Information

- Our BERNINA Longarm quilting machine can accommodate quilt tops up to 108" wide, with no restrictions on length.

Things to Know Before Quilting

- Computerized quilting machines perform best with
  - Good quality quilting fabric and thread
  - Flat quilt tops and backs
  - Smooth seams without puckers, holes, bumps, or excessive fullness
- Quilts requiring repairs or additional preparation before loading onto the machine will incur a preparation fee of $35/hour.
- During your quilt check-in, quilting designs can be adjusted and resized to best fit your quilt and block layout.

Fullness Disclaimer

- Please note that fullness and puckers within quilt tops or borders cannot always be quilted out completely. While we do our best to minimize these issues, we cannot guarantee that puckers or tucks will not be sewn into the finished quilt. Excessive fullness may also affect how square the finished quilt lays.

Mechanical Disclaimer

- Longarm quilting machines are mechanical devices. While we take every precaution to ensure quality results, rare mechanical issues may occasionally occur and could result in minor damage to a quilt top or backing. If this happens, we will do our best to repair the issue or provide compensation at our discretion.

Quilt Scheduling Information

- Quilts are scheduled on a first come, first served basis. At the time of quilt drop-off, you will be given an estimated timeframe for when your quilt is expected to be loaded onto our quilting frame.
- We typically schedule 3–4 quilts per week, though timing may vary depending on the size and complexity of each project.
- Our BERNINA Longarm quilting machine operates during regular business hours while the store is open and running. We intentionally allow a little extra time in our schedule to help accommodate unforeseen delays, but we always strive to complete quilts earlier than expected whenever possible.
